## Summary

Highly driven and results-oriented Java Full Stack Developer with over 1.3 years of experience in designing, developing, and maintaining scalable web applications. Proficient in both front-end and back-end technologies with a strong command over Java, Spring Boot, Angular, RESTful APIs, and SQL. Adept at delivering efficient and user-friendly solutions while maintaining high code quality and performance standards. Skilled in the full software development lifecycle, with a proven ability to collaborate effectively, solve complex technical problems, and consistently meet project deadlines. Passionate about continuous learning and contributing to impactful, innovative software systems.

## Work Experience

### FlynautSaaS Pvt. Ltd.

May 2024 - Present

*Java Full Stack Developer*

*Pune, Maharashtra*

- Developed and consumed RESTful APIs for employee, dock, yard, and slot management modules using Spring Boot.
- Implemented JWT-based authentication and role-based access control to secure endpoints.
- Created OTP generation and verification system for secure login and critical operations using email-based validation.
- Built secure Forgot Password flow with email triggers and reset links.
- Integrated browser and location detection to log device metadata for enhanced security.
- Designed responsive Angular UI components for slot booking, dashboards, and internal modules.
- Led API testing using Postman; validated all login, lock, reset, and failure flows.
- Used GitHub for version control and collaboration with a distributed team.
- Conducted code reviews and implemented performance optimizations for frontend and backend.
- Also designed and developed a scalable eCommerce web application using Java, Spring Boot, Angular, and MySQL.
- Built a robust platform to streamline dock and yard logistics, covering slot booking, vehicle tracking, dock utilization, and employee coordination.
- Improved operational visibility and reduced delays through secure multi-module access and real-time updates.

## Projects

### Dock And Yard Management System (Company Project)

- Developed logistics portal using Java, Spring Boot, Angular, and MySQL to manage docks, yards, employees, and slots.
- Implemented JWT-based role security, OTP login, and forgot password functionality with email-based flow.
- Logged device/browser metadata for security; built responsive Angular UI and tested APIs via Postman.

### eCommerce Web Application (Personal Project)

- Built a scalable full-stack eCommerce app with Java, Spring Boot, Angular, and MySQL.
- Implemented product/user CRUD, cart features, dynamic filtering, and Razorpay-ready payment integration.
- Added role-based access control and responsive UI for smooth UX.

### Food Delivery App (Personal Project)

- Designed and implemented a food delivery platform with Spring Boot and Angular.
- Enabled real-time order tracking, secure login, and admin panel for restaurants.

## Education

### I.H.M Bhopal

Jul 2019 - Jun 2022

*Bachelor of Science*

*Bhopal, MP*

- Focused on management, business processes, and analytical thinking. Developed foundational skills transferable to software development and team collaboration.

## Technical Skills

**Programming Languages:** Java, TypeScript, JavaScript

**Frameworks & Libraries:** Spring Boot, Spring Security, Hibernate, Angular, React Js, JSON

**Web Technologies:** HTML5, CSS3

**Databases:** MySQL

**Tools & Platforms:** Postman, GitHub, Maven

**Security & Authentication:** JWT, OTP-based Email Authentication

**Development Areas:** REST APIs, RESTful Services, API Development, Full Stack Development, Frontend Development

**Other Skills:** Email Service Integration, Browser and Device Detection, Adaptive Problem Solving, Code Debugging

## Career Goals

To secure a challenging position as a Full Stack Developer where I can contribute to innovative software solutions, expand my technical skills, and grow within a collaborative and fast-paced environment.
